

For your BB5000 Portable Boring Machine

The new Climax Face-Adjustable ID Bearing Mount greatly increases the versatility and adaptability of your BB5000 Boring Machine. This new ID Bearing Mount provides you with a wide mounting range and the ability to easily install and adjust the mount from the open face portion of your bore. Independently adjustable mounting legs also simplify centering the mount in bores which are not perfectly round. The Climax ID bearing mount is ideal for mounting your BB5000 Boring Machine in "deep" or "blind" bores or for any boring application where limited space is available for an OD bearing mount.

Key Benefits

- Wide internal bore mounting range of 5.75" to 12.50" (146.05 mm to 317.50 mm). One ID bearing mount covers a range formerly requiring multiple mounting assemblies.
- ID Bearing Mount is easily adjustable from the open bore end using a speed wrench. No need to try and reach deep inside the bore. Simplifies and speeds up the mounting operation.
- Each supporting leg is individually adjustable. Allows you to quickly center the mount inside bores which are not completely round.

Typical Applications

- Hydraulic cylinder boring
- Hydropower wicket gate blind bores
- Precision facing procedures
- Any application that includes a "deep" or "blind" bore
- Any application where limited space is available for an OD bearing mount
