 **CLIMAX**
Portable Machining & Welding Systems

Revised November 2014

Backed by Over 45 Years of Experience

Climax pioneered the concept of portable machine tools in 1964. Since that time, Climax has grown to become the world's largest provider of innovative on-site machining solutions. Climax currently holds 33 patents for unique portable machine tool products and technology.

Professional, Experienced Instructors

The Climax Academy is a part of Climax Portable Machining & Welding Systems. All training programs are taught by experienced Climax Trainers. Your instructor will provide valuable information on operator safety, tool set-up, mounting, and operation that will help you complete your on-site machining tasks quickly and to the highest quality standards.

Top-Rated Reference Training Materials

All Climax Academy students receive a comprehensive training manual which includes valuable information about machine set-up and operation. The manual also contains a special section on cutting tools and how to select the best tool for your particular application. You will also find many tips on how to keep your portable tools in top operating condition. Climax Academy programs have consistently received top ratings from participants.

Modern Training Facilities:

The Climax Academy has locations around the globe, including:

- **CLIMAX World Headquarters in Newberg, Oregon USA**
- **CLIMAX facility in Houston, Texas USA**
- **CLIMAX Facility in Düren, Germany**

ON-SITE MACHINE TOOL OPERATION COURSES

Operation Course Overview

These machine operation training programs will provide you with a strong working knowledge of each tool. Courses feature extensive hands-on training complemented by class room instruction.

Each basic course will cover the following areas with mostly hands-on training.

- **Operator safety**
- **Tool component review and set-up**
- **Standard operational techniques**
- **Overview of cutting tools and recommended usage**
- **Maintenance procedures for long tool life**

The Climax Academy Team will do their best to meet your scheduling needs. Please call for available dates.

Classes Available

(classes can vary in length due to size and needs of the customer)

- **In-house Costs per day - \$1035 first Student, \$350 additional students up to (4 total)**
- **On-Site Costs per day - \$1765 first Student, \$350 additional students up to (4 total)**
(plus travel expenses)

Standard Machines

- **Boring Bars**
- **Bore Welding Machines**
- **Lathe Machines**
- **Milling Machines**
- **Flange Facers**
- **Calder Valve Testing Equipment.**
- **Valve Repair (Machining, Grinding & Lapping)**
- **Optical alignment training** *(metrology, setup and alignment)*

Ask your sales person for the recommended days needed per machine.

SPECIALIZED MACHINE TOOL TRAINING COURSES

Five Machines in Five Days

A special course to provide you with an overview of 5 different on-site machines. This course is designed for maintenance & facility managers, plant engineers, foreman and facility machinists who would like to learn how a comprehensive range of portable machine tools can be utilized to solve a variety of new project & maintenance challenges. Instruction includes both classroom & hands-on experience with each class of machine tool.

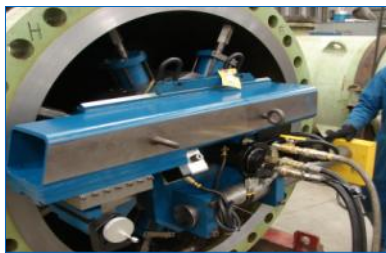

Day One:	On-Site Boring and Bore Welding Machines
Day Two:	On-Site Valve Repair & Refurbishment Machines
Day Three:	On-Site Milling Machines
Day Four:	On-Site Flange Facing Machines
Day Five:	On-Site Lathes

On-Site Machining Solutions for the Shipbuilding Industry

A 3-day course designed specifically for the new project, retrofit & maintenance needs of the shipbuilding industry. The course will focus on innovative on-site machining solutions designed to complete challenging shipbuilding procedures in less time and at reduce costs. This is an applications oriented course and students will be trained on a variety of machine tools designed for use within the ship building industry. Students are encouraged to bring specific application needs to the class for discussions with your instructor.

**** Classes fill up quickly—Call for available dates! ****

*All students will receive a comprehensive training manual
and a certificate of achievement will be issued
following course completion.*
