

## For Models Ti, BR140 and MB110

Our patent protected Multi-Prep® innovation has proven to be so effective in improving productivity and quality that the general concept has been expanded to include a complete family of cutters.

These cutters include customization of standard Multi-Prep® designs such as the extended reach for fin removal/ O.D. clean and O.D. bevel cutter. Others have specialized tool options like our single side clad removal cutter. The cutter head is mounted on a tool with an offset centershaft to accurately remove cladding from just one side of the tube. The other side is untouched. Place the same cutter on a tool with a standard centershaft and you can clean tube O.D.'s, remove wear resistant cladding and/or remove membranes from panel tubes.

H&S Tool will customize tools and adapt cutters to solve your tough tube and pipe machining problems.

### O.D. BEVEL AND....

- Remove Fins
- Remove Overlay
- Remove Membranes
- Clean Tube O.D.

### SIMULTANEOUSLY

Multi-Prep® is protected under one or more U.S. patent numbers 6,955,507 - 5,542,177 - 7,143,673 - 7,140,816 - 7,313,992
